

External User Login Flow for SSO-enabled Schedules

External users of an organization can bypass SSO by creating an account that uses an email address with a pre-approved email domain. Please work with the Amion business application contact at the hospital to make sure your external organization's email domain has been approved to access the schedule.

1. Navigate to www.amion.com
2. Click 'Email Sign In' in the upper right.

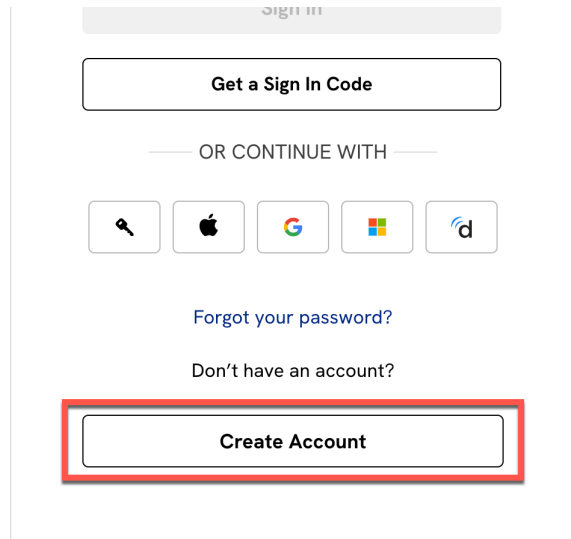

3. This will bring you to the Sign In Screen. Within the Sign In screen, enter your email and password for your **Amion Account** and click Sign In.

Sign In

☐ This is a shared computer

If you do not have an account click 'Create Account' to create one.

12. Click Go

You will only need to create an account and sign in ONE TIME. The next time you access www.amion.com you will be brought directly to the Amion Organization's Screen to enter your Access Code.

Please Note: If your organization sets an auto-timeout for applications, every time you're auto-logged out of the Amion application you will need to sign in using your username and password per the steps 1-3 above to access the Amion Organizations screen.
